

TRANS-PACIFIC PARTNERSHIP

A BAD DEAL FOR CANADA

CANADIAN JOBS

The TPP would allow foreign corporations to use foreign labour for work in Canada. This could lead to tens of thousands of Canadians being laid off.

DAIRY FARMING

The TPP would allow more foreign dairy products into Canada, significantly harming Canadian farmers.

HEALTH CARE

The TPP would drive up prescription drug costs, while undermining future investments in health care programs.

AUTO SECTOR

The TPP would lead to the shuttering of auto manufacturing plants and could eliminate up to 20,000 jobs.

VANCOUVER TOWN HALL MEETING

The TPP threatens tens-of-thousands of Canadian jobs, will lead to higher prescription drug costs, and threatens our health care system.
